

**Boil Water Notice – 02-6-2026**

**PUBLIC NOTICE TO BOIL WATER For the following:**

**Plant F – Edgewood Pressure Plane**

**Any customer in the area above who experiences low to no pressure during the emergency line repair on FM 1504**

Due to reduced pressure in the distribution system during water leak repairs at FM 1504, the VZ County Road listed above experienced a pressure drop below 20 pounds PSI. The Texas Commission on Environmental Quality (TCEQ) has required our water system, MacBee Special Utility District, PWS I.D. # 2340012, to notify customers of the need to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc.). Children, seniors, and individuals with weakened immune systems are particularly vulnerable to harmful bacteria; therefore, all customers should follow these directions.

To ensure the destruction of all harmful bacteria and other microbes, water for drinking, cooking, and making ice should be boiled and then cooled before use. The water should be brought to a vigorous, rolling boil and then boiled for two minutes. Instead of boiling, you may purchase bottled water or obtain water from another suitable source.

When it is no longer necessary to boil the water, the water system officials will notify you that the water is safe for consumption.

Instructions to discontinue boiling will be issued in the same manner as this notice.

If you have questions concerning this matter, you may contact the Office at (903) 873-2109.
