

Boil Water Rescind Notice For:

**VZCR 3822, 3707, 3706, 3834, Blue Haven, Ash Cove,
and Holiday Estates**

**Any customer in the area above who experiences low to no
pressure during the line repair on May 7, 2026.**

On **May 7, 2026**, the Texas Commission on Environmental Quality (TCEQ) required our public water system MacBee Special Utility District, PWS ID #23400012, to issue a Boil Water Notice (BWN) for the above area and to inform our customers that due to the distribution pressure dropping below 20 PSI, or an interruption in service, water from our system must be boiled before consumption.

Our system has taken the necessary corrective actions to restore adequate pressure, disinfectant levels, and/or bacteriological quality. It has provided TCEQ with testing results indicating that the water no longer requires boiling as of May 9, 2026.

If you have questions, contact the Office at 903-873-2109 or 430-307-5544. If a customer wishes to reach TCEQ, they may call 512-239-4691.
