

Boil Water Notice – 05/21/2026

PUBLIC NOTICE TO BOIL WATER For the following:

VZCR 2120, 2620, 2602, FM 47 S to 243, and State Hwy 243 between FM 47

Any customer in the area above who experienced low or no water pressure during the emergency line repair.

Due to reduced pressure in the distribution system during water leak repairs at VZCR 2120, the area listed above experienced a pressure drop below 20 pounds PSI. The Texas Commission on Environmental Quality (TCEQ) has required our water system, MacBee Special Utility District, PWS I.D. # 2340012, to notify customers to boil their water before consumption (e.g., washing hands or face, brushing teeth, drinking, etc.). Children, seniors, and individuals with weakened immune systems are particularly vulnerable to harmful bacteria; therefore, all customers should follow these directions.

To ensure the destruction of all harmful bacteria and other microbes, water for drinking, cooking, and making ice should be boiled and then cooled before use. The water should be brought to a vigorous, rolling boil, then boiled for 2 minutes. In lieu of boiling, you may purchase bottled water or obtain water from a suitable alternative source.

When it is no longer necessary to boil the water, the water system officials will notify you that the water is safe for consumption.

Instructions to discontinue boiling will be issued in the same manner as this notice.

If you have questions concerning this matter, you may contact the Office at (903) 873-2109.
