

**Boil Water Rescind Notice  
For:**

**VZCR 3406, 3412, 3404, 3418, 3419, 3429, 3403, 3443, 3419,  
3417 (partial), and Hwy 64.**

**Any customer in the area above who experiences low to no  
pressure during the line repair on June 13, 2026.**

On **June 13, 2026**, the Texas Commission on Environmental Quality (TCEQ) required our public water system MacBee Special Utility District, PWS ID #23400012, to issue a Boil Water Notice (BWN) for the above area and to inform our customers that due to the distribution pressure dropping below 20 PSI, or an interruption in service, water from our system must be boiled before consumption.

Our system has taken the necessary corrective actions to restore adequate pressure, disinfectant levels, and/or bacteriological quality. It has provided TCEQ with testing results indicating that the water no longer requires boiling as of June 16, 2026.

If you have questions, contact the Office at 903-873-2109 or 430-307-5544. If a customer wishes to reach TCEQ, they may call 512-239-4691.
