

Scheduled Work

MacBee and the Contractor will work to tie in the new 12-inch main into the existing system.

This work will begin at 8:00 AM tomorrow, Wednesday, May 15, 2024.

This will affect MacBee's customers in the Plant C pressure plane. Customers can expect low pressure, and there could be a water outage in this area. If a water outage occurs, a boil water notice will be issued by T.C.E.Q. Guidelines.

We apologize for the inconvenience this will cause our customers.

The Plant C Pressure Plane includes the following:

VZCR 2112,2124,2128,2129,2138,2139,2140,2144,2146,2147,2148,2149,
